NEW YORK SCHOOL HEALTH SERVICES

As of September 1, 2007; Students that are both (1) born on or after 1/1/94 AND (2) who are entering Grade 6 or Grade 7 (or is in a comparable age level special education program) require a Pertussis booster in the form of a Tdap immunization. If a student has received a tetanus booster within the last two years, the student may not receive a Tdap for two years following that date. The school nurse should track that student and be sure that they have received the Tdap immunization when appropriate.

PERTUSSIS IMMUNIZATION WORKSHEET

		Tdap Booster (complete one)		Tracking Information	
Student Name	**Birthdate**	**Date of Booster**	**No Booster**	**Date of latest tetanus**	**Date may have Tdap**
